Plan Deer Area Study

Public inspection of northern lower peninsula deer starvation areas is scheduled by the conservation department for Sunday, April 20.

Hunters and other interested persons are invited to make the first-hand examination of yarding conditions. Two department conducted tours will begin at 10:00 a. m., one commencing at the Mio district headquarters and the other at Shoppenagons Inn at Grayling.

Persons planning to go are advised to bring a lunch, waterproof footwear, comfortable field clothes, and a compass if possible. Those possessing cameras will have a good opportunity to film the results of an overbrowsed deer range.

State herd loss is expected to be roughly 10-20,000 head as compared to 40,000 deer cut down in the 1950-51 winter and spring.

Last year, a record crowd of nearly 500 sportsmen and their wives, students and others from more than 21 southern Michigan cities hiked through starvation areas.

2 County Girls In Trout Queen Contest

Already the Conservation Department has started planting trout, 2500 Brooks, all legal size, 7-10 inches have been planted in Rug Pond, Big Rapid River and Little Rapid. 90 large Brown trout have been planted from State Highway No. 66 down stream on the Big Manistee, all of these were 19 inches or over.

According to the state Conservation men the public have been missing a big bet in Kalkaska County, Big Twin lake has shown on surveys that there are plenty of 20 to 24 inch rainbows in this lake. This should prove good news to the early trout fishermen.

There are some boats on this lake to rent, but to be sure of one bring your own.

The prizes to be given exceed all other years as there will be many glass rods and other fishing equipment for the best catches.

Korean Hero's Body Home

The body of Melvin E. Marshall, Crawford County's first loss in the Korean campaign arrived in San Francisco Tuesday enroute to Grayling.

His body was among 217 American war dead of which nine were from Michigan that arrived in San Francisco aboard the Alamo Victory. Next of kin have been notified of the imminent arrival of the vessel. The bodies will be sent with an escort to the point designated by each individual next of kin.

Pvt. Melvin E. Marshall, 18, was the son of Melvin J. Marshall of Grayling and Mrs. Edna Wiseman of Spokane, Washington. He lost his life in the United Nations struggle in Korea on September 4, 1950.

Melvin was born in Cheboygan on May 30, 1932, and with his parents came to Grayling, where he had resided most of his life.

Young Marshall entered the armed service at the age of 15 years and 7 months and received his first training at Fort Knox, Kentucky. He spent 15 months of service on Okinawa.

A graduate Paratrooper, he took his training at Fort Knox, Ky. and Fort Benning, Ga. and then served in Okinawa.

While at Fort Benning he was injured in a crash landing and spent three months in a hospital.

After a furlough spent in Grayling he departed from Washington State on July 25, 1950, and only word his father had that he was in Korea.

Because he was not needed as a paratrooper he was serving in a tank battalion at the time he was killed.

He is survived by his parents, three sisters, Julia Ann, Camilla, and Kathleen Marshall; his grandmother, Mrs. Lula Adams of Cheboygan, and his grandfather, Earl Marshall, of Grayling.

Cancer Notes

From the Michigan Cancer Society in co-ordination with the American Cancer Society, such words as these have come from national leaders: William Green, president American Federation of Labor; John L. Lewis, president United Mine Workers of America; Francis Cardinal Spellman, Ralph Bunche, United Nations, and Omar Bradley General of the Army.

"One out of every five persons will some day be stricken with cancer and one out of seven will die of the disease. The present margin of curing one out of every three can be vastly improved."

Our neighborly coffee day netted us \$21.21. Fine, and thanks. The co-operation of workers and citizens is splendid.

To Mrs. George Hilton, instructor of nurses at Mercy Hospital, is given the position of spending our cancer fund wisely. Needs for bandages, pads and beds for home use are coming in gradually and often we cannot supply them.

A meeting of all workers will be held at Mrs. Emma MacAuley's home, Monday, April 21 at 8 o'clock at our regular meeting.

On Wednesday, April 23rd the Girls Service Club of the Grayling High School under the leadership of Miss Anita Crawford will meet at MacAuley's at 4:30.

Mrs. Emma MacAuley, Commander Crawford County Cancer Fund.

Hope Re-born

THIS YEAR, April 13 is Easter Sunday. Whether beneath the vault of a sunrise sky or that of a church, religious services will devoutly observe the Resurrection of Christ from the dead, and re-birth of hope in the hearts of men.

THERE will be, too, (for this land is free), those traditional superficial symbols which date back to the ancient Anglo-Saxon rites for Ostara or Eostre, legendary goddess of Spring; the eggs and the rabbits which denoted life's reproduction, the first flowers of reburgeoning Earth, projected today into new finery and hats.

IN THESE bright tokens, however, the deep and holy significance of Easter should not be lost. Neither should we forget, in marking the Resurrection, that there is something our country and all who cherish it stand today greatly in need of—a spiritual re-birth, a national regeneration of morals and men.

Want a lot of mileage for your money?

WE'LL admit that the price tags of automobiles—all automobiles—aren't what they used to be.

But it's just as true today as ever before that some price tags are lower than others, and some cars cost less to own than others.

So let's see how a Buick SPECIAL fits into the picture.

Take first cost. If you put the price tag of this Buick against price tags of cars that have always been tagged as belonging in "the low-priced field"—you'll find that, in actual dollars, a Buick's surprisingly close to these cars of lesser size and horsepower.

But that's just the beginning.

What you're getting here is Buick quality—this SPECIAL comes down the

same assembly line as SUPERS and ROADMASTERS.

Its heft tells you it has extra sturdiness in frame and structure.

Its Fireball Engine delivers extra power. It is an eight, a valve-in-head, with high compression, and the miles you can get from a gallon of gas make it a thrifty performer.

You get Buick's Million Dollar Ride, which protects you—and the car—from jars and jolts.

Even the tires are bigger—which, any tire man will tell you, lengthens their wear.

And if you pay a bit extra for Dynaflo Drive* you're easing the strain on the engine, the rear end, the tires—and eliminating clutch repair bills.

So when we talk about "mileage for your money" we're talking about the miles you'll get from your car—including the unused miles that are what you have to sell when you trade it in.

Maybe that's why Buick's doing so well in the present market. Why not come in and see what a great car this is for you?

Equipment, accessories, trim and models are subject to change without notice. Wheel Covers standard on ROADMASTERS, optional at extra cost on other Buicks. White sidewalls optional at extra cost when available. *Standard on ROADMASTERS, optional at extra cost on other Buicks.

Michigan Mirror

The big noise in Michigan is still—taxes and the possibility of a constitutional convention, those two playmates who are getting kicked around so much these days.

But not to Governor Williams. Taxes, yes, but not a constitutional convention.

And remember, the lanky Williams, when he walks, makes very big footprints on the political battleground.

The governor admits the state's tax structure is faulty, but he says a constitutional convention would not repair that tax structure in time. The answer—his 4 percent corporation tax, of course.

But to go back to the beginning. Williams first wants reappointment before a convention. A "con-con" provides that three delegates shall be named from each senatorial district.

"The state senate now is unrepresentative," he says, "because they have failed to confirm to the present constitution, which requires reappointment every 10 years."

"Having failed to live up to the present constitution, some legislators want to write a new one. But to hold a constitutional convention, based on the present unrepresentative senate, would be to compound inequity."

"If the legislature sincerely wants to revive the constitution (and this certainly is in order) let it first follow the present constitution and when that is done I will have no objections."

Governor Williams points out that such a convention first must be approved by a majority of ALL THOSE VOTING in the November election, the delegates then would meet, spend many months working up a new constitution and then the document must be resubmitted to the people which would make it sometime around 1954 before the constitution becomes effective.

"The state's acute financial problems must be solved before any new constitution could possibly go into effect. It can't truthfully be represented as any solution to the state's problem."

In Williams' first tax message of 1949 he said that he wished he could recommend a general revision of the state's patchwork tax structure, but that the state's financial condition is such that he felt there wasn't time.

And he points out now that the only thing that has changed since that time is the sales tax revenue which has increased 20 percent.

He admits the present situation is bad—but he is opposed to the basic theory of G.O.P. taxing. He says this program is based upon the recovery of funds now being returned to local units of governments and more consumer taxes.

The governor has pledged himself to veto any tax bills following those lines.

"The little man in Michigan already is paying 80 percent of the

total revenue," he says curtly, "the national average is 60 percent."

Some local units are not using the diverted funds to good advantage, the governor justifiably agrees, but he adds that "the legislature had made no distinction."

Lee Thurston, state superintendent of public instruction, says \$400 million are needed to bring the school system up to date.

"As long as that condition exists," Gov. Williams says, "I will not go along with cutting diversion to the schools."

He still thinks a corporation tax will do the job without a general price increase and he points out that 23 other states have corporation taxes with no appreciable change in prices.

A corporation tax would bring in \$80 million, but from that would be subtracted the corporation franchise taxes which would net the state \$60 million.

Williams makes the following points:

1. It would protect new business—it wouldn't have to pay the tax until it began to make money.

2. Small business corporations now pay more under the franchise tax.

3. Most small businesses are not incorporated. And he also points out that in such cases as the automobile business in which Republicans say car prices would go up \$3 per car, 85 percent of the automobiles are sold out of state.

Yes, it has been a long and bitter struggle—and the end is not in sight. Our Democratic governor will sign no Republican taxes—and he admits himself that he has no hope this legislature will go along with corporation tax.

Meanwhile, the state's general fund is depleting.

If the Michigan legislature hews to the line and balances the budget as leaders now propose, Washington may have something to think about. Consider these facts about Federal spending by Congress:

Since 1940 national income has increased from 90 billion per year to approximately 300 billion per year, approximately 300% increase.

Now consider some departmental budgets: Department of Commerce is up 1,709.67%.

Department of Interior is up 594.27%.

Labor department is up 720.69%.

Justice Department is up 273.56%.

State Department is up 1,934.40%.

All this in only 13 years.

In 1947 Government expenditures ate up 22.2% of nation's income; 1953 Budget will take over 30% of Nation's income.

To Federal Government's take must be added state, local taxes, another 20 billion at least.

Think it over. The American taxpayers are footing the bill.

Hunting Death Toll Declines Again

Conservation department completed summary shows 23 deaths and 200 injuries in last year's hunting seasons; marking the second consecutive year of declining fatalities and increasing non-fatal accidents. Injury tally was a new high.

Department recorded 25 deaths and 190 injuries in 1950 and 28 deaths and 173 injuries in 1949. Licensed firearm hunters in the field increased in each case, as follows: 1,011,053 in 1949, 1,020,172 in 1950—and an estimated 1,030,000 last year, second only to 1946's 1,042,999.

There were fewer accidents in the deer season, 13 deaths and 54 injuries as compared to 18 deaths and 55 injuries the previous season. But small game hunting mishaps increased, 10 deaths and 146 injuries as compared to seven fatalities and 135 wounded in 1950.

As usually is the annual story, the hunter's biggest danger was his own gun or guns of members of his own hunting group. All 10 fatal small game mishaps resulted one way or the other. Twenty-four small game seekers injured themselves, 6 were wounded by own party members and 39 were struck by members of other parties. Responsibility in seven cases is unknown.

Of the deer season fatalities, five were victims of their own guns, four were shot by members of the same group and four were hit by other group members. Twelve injured themselves, 14 were wounded by same party members, 25 hit by other party members, and responsibility in three cases is unknown.

Ages of 161 hunters are known, as follows: 65 were over 30, 33 were between 21 and 30, 23 were between 17 and 21, and 50 were under 17 years.

THE CENTRAL IDEA

Things you'd like to know about your Railroad

Two Sides of a Railroad Ledger

NEW YORK
CENTRAL
SYSTEM

1. **MAIN INCOME ITEM** is freight. It brings in about
70% of New York Central's income. That's why
it's been so serious for freight rates to lag far
behind wages and supply costs. Leaving your
Railroad too little net earnings to go on with all
improvements planned to serve you better.

2. **PASSENGER TICKETS** provide only about 15% of
Central's income. Another 11.8% comes from
mail, express, and even such items as vending
machine concessions in stations. For these days,
a railroad needs every penny! The final 2.8% of
Central's 1951 income came from investments.

3. **110,000 PAY ENVELOPES** plus employee benefits
take 60% of all Central income. Almost 24%
goes for fuel, rails, and hundreds of things Cen-
tral buys at prices that have risen far more than
its own rates! Depreciation takes 4.4%. Interest,
rent, etc., 5.8%. Taxes 4.2%. Leaving 1.8% net.

4. **EVERYBODY SHARES!** In 1951, Central railroads
spent \$468,546,000 pay in states and towns like
yours. The things Central bought helped farms
and local industries. It's one more way your
Railroad forms a living part of every commu-
nity on its lines. And that's the CENTRAL IDEA!
